

ANGGIYASTI YAKTINING PUTRI

Karawang, West Java, Indonesia | 08112192224 | putrianggiyasti@gmail.com
linkedin.com/in/anggiyasti-putri | github.com/anggiyasti

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience designing and delivering scalable, high-performance systems across international logistics and educational technology domains. Proficient in full-stack development using Node.js, NestJS, TypeScript, React.js, Vue.js, and PHP (Laravel, CodeIgniter), with hands-on experience in RESTful API design, microservices architecture, cloud infrastructure (AWS, DigitalOcean), and database optimization (MySQL, MongoDB, Redis). Proven track record of improving backend performance by 20–30% through targeted optimization. Collaborative team player who bridges engineering and product to drive impactful outcomes.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, PHP, Node.js, NestJS, React.js, Vue.js, Nuxt.js, Laravel, CodeIgniter

Databases: MySQL, MongoDB, Redis

Infrastructure & Tools: Git, AWS, DigitalOcean, Docker

Core Competencies: RESTful API Design, System Architecture, Performance Optimization, Microservices, Third-Party API Integration (Xendit, Xero), Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Senior Software Engineer | PT. Eximku Teknologi Indonesia (Andalin)

January 2018 – February 2025 (7 years 2 months) · Bandung, West Java, Indonesia · Hybrid

- Worked extensively on backend and full-stack development for Andalin Shipping, Andalin Trade, and Syncargo a SaaS freight-forwarding platform serving international logistics and import/export operations.
- Built and maintained scalable backend services using Node.js and NestJS; developed frontend applications with React.js, Vue.js, and Nuxt.js.
- Designed and optimized RESTful APIs powering shipment tracking, quotation management, document handling, supplier onboarding, and procurement automation workflows.
- Utilized MySQL, MongoDB, and Redis for efficient data storage, querying, and caching across high-traffic services.
- Integrated third-party APIs including Xendit (payments) and Xero (accounting) to support end-to-end business workflows.
- Improved backend response times by 20–30% through query optimization, indexing strategies, and Redis caching.
- Collaborated with cross-functional teams product, design, QA, and DevOps to ensure seamless feature delivery and deployment.
- Deployed and managed applications on AWS and DigitalOcean cloud infrastructure.

Fullstack Developer | PT. Cipta Nur Buana

September 2017 – December 2017 (4 months) · Bandung, West Java, Indonesia · On-site

- Designed and developed a digital learning media system for Journal Academy and Neutron Yogyakarta using PHP, CodeIgniter, and MySQL.

- Implemented user authentication, content management, video and PDF delivery, and responsive UI with a modular architecture for scalability and maintainability.

Fullstack Developer | Sibejoo

November 2016 – August 2017 (10 months) · Bandung, West Java, Indonesia · On-site

- Built and maintained a free online learning platform serving Indonesian students, aligning technology with an educational access mission.
- Developed video-based and interactive learning modules using PHP, CodeIgniter, and MySQL, including student progress tracking and seamless video playback.
- Collaborated with UI/UX designers and educators to create intuitive, student-friendly interfaces that supported a growing user base.

EDUCATION

Bachelor of Engineering, Informatics Engineering

Universitas Pasundan, Bandung · 2012 – 2016 · GPA: 3.68 / 4.00
