

ANGGIYASTI YAKTINING PUTRI

Karawang, West Java, Indonesia | 628112192224 | putrianggiyasti@gmail.com | linkedin.com/in/anggiyasti-putri | github.com/anggiyasti

PROFESSIONAL SUMMARY

Over the past 8+ years, I've been building and shipping software for international logistics and edtech platforms mostly working full-stack with Node.js, React.js, Vue.js, NestJS, and PHP (Laravel).

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, PHP, Golang, Node.js, Express.js, NestJS, Laravel, CodeIgniter, React.js, Next.js, Vue.js, Nuxt.js

Databases: MySQL, MongoDB, Redis

Infrastructure & Tools: Git, AWS, DigitalOcean, Docker

Core Competencies: RESTful API Design, System Architecture, Performance Optimization, Microservices, Third-Party API Integration, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Freelance Fullstack Developer | Self-Employed

March 2025 – Present · Remote · Freelance

- Providing end-to-end fullstack development services for clients across various industries, covering web application design, development, and deployment.
- Building scalable and maintainable applications using PHP (Laravel), Node.js, React.js, and MySQL.
- Architecting and integrating RESTful APIs, third-party services, and cloud infrastructure to meet client requirements.
- Managing full project lifecycle from requirement gathering, technical planning, implementation, to delivery and post-launch support.

Senior Software Engineer | PT. Eximku Teknologi Indonesia (Andalin)

January 2018 – February 2025 (7 years 2 months) · Bandung, West Java, Indonesia · Hybrid

- Worked extensively on backend and full-stack development for Andalin Shipping, Andalin Trade, and Syncargo a SaaS freight-forwarding platform serving international logistics and import/export operations.
- Built and maintained scalable backend services using Node.js and NestJS; developed frontend applications with React.js, Next.js, Vue.js, and Nuxt.js.
- Designed and optimized RESTful APIs powering shipment tracking, quotation management, document handling, supplier onboarding, and procurement automation workflows.
- Integrated with multiple third-party services
- Collaborated with cross-functional teams, product, design, QA, and DevOps to ensure seamless feature delivery and deployment.
- Deployed and managed applications on AWS and DigitalOcean cloud infrastructure.

Fullstack Developer | PT. Cipta Nur Buana

September 2017 – December 2017 (4 months) · Bandung, West Java, Indonesia · On-site

- Designed and developed a digital learning media system for Journal Academy and Neutron Yogyakarta using PHP, CodeIgniter, and MySQL.
- Implemented user authentication, content management, video and PDF delivery, and responsive UI with a modular architecture for scalability and maintainability.

Fullstack Developer | Sibejoo

November 2016 – August 2017 (10 months) · Bandung, West Java, Indonesia · On-site

- Built and maintained a free online learning platform serving Indonesian students, aligning technology with an educational access mission.

- Developed video-based and interactive learning modules using PHP, CodeIgniter, and MySQL, including student progress tracking and seamless video playback.
- Collaborated with UI/UX designers and educators to create intuitive, student-friendly interfaces that supported a growing user base.

EDUCATION

Bachelor of Engineering, Informatics Engineering

Universitas Pasundan, Bandung · 2012 – 2016 · GPA: 3.68 / 4.00
